About this course

This course covers what you need to know about the Control of Substances Hazardous to Health (COSHH). It's aimed at anyone who is exposed to Substances Hazardous to Health at work, as well as line managers with responsibility for such people.

So what do we mean by 'Substances Hazardous to Health'?

In legal terms, these are substances that are classified as "very toxic, toxic, harmful, corrosive or Irritant" under the Classification, Labelling and Packaging Regulation (CLP). This was a new regulation that came into force in January 2009 dovetailing with a set of regulations called REACH. REACH is a European Union regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals, which came into force on 1st June 2007. One of the main aims of REACH is to provide a high level of protection for human health and the environment from the use of chemicals.

Course modules

Module	Title	Pass mark
1	Introducing COSHH	70%
2	Different Types of Hazard	70%
3	Different Types of Exposure	70%
4	Regulations and Approved Labelling	70%
5	Assessing COSHH Risks	70%
6	The Risk Assessment in Practice	70%
7	Exposure Control	70%
8	Staying in Control	70%
9	Training and Emergency Planning	70%
10	Course Summary	70%
