NEBOSH ELEARNING

NEBOSH Fire Safety Certificate

Awarded by NEBOSH | SWT is a NEBOSH Gold Learning Partner

PRICE	STUDY	SUPPORT
From £499	Self-paced online	Tutor support

About this course

The NEBOSH Fire Certificate (NEBOSH Certificate in Fire Safety) is a specialist fire safety qualification that provides learners with a strong understanding of how to identify fire hazards, assess fire risks, and implement effective controls. This NEBOSH Fire Safety course focuses on practical Fire Safety management in low- to medium-risk workplaces and is based on current UK fire legislation and recognised guidance.

This fire safety training helps organisations to:

- Improve fire prevention and protection measures and reduce the likelihood of workplace fires
- Understand how their premises, activities and processes impact fire risk
- Strengthen compliance with fire safety legislation and reduce the risk of enforcement, fines and business interruption
- Develop and maintain suitable fire risk assessments and emergency plans that stand up to insurer and regulator scrutiny

The NEBOSH Certificate in Fire Safety is assessed by a fire safety exam and a practical fire risk assessment, showing you can spot hazards and recommend sensible controls in a real workplace.

Studying by eLearning

- Fully online, self-paced NEBOSH Fire Certificate course with flexible study
- Study anytime, anywhere with tutor email support when you need it
- Exam option: £799 including the FSC1 open book exam and FSC2 practical fire risk assessment (£499 without exams)
- Unlimited course access and online learner resource folder to support revision

Who is the course for?

This course is ideal for managers, supervisors, fire marshals, health and safety advisers and anyone responsible for fire safety or fire risk assessments in the workplace.

What you will learn

- NEBOSH Fire Certificate syllabus

What is covered in the course syllabus?

The syllabus covers fire safety management, the principles of fire and explosion, common workplace fire hazards, fire risk assessment and practical fire safety controls and emergency arrangements.

Unit FSC1 - Fire Safety and Risk Management

- Element 1: Managing fire safety
- Element 2: Principles of fire and explosion
- Element 3: Fuel, oxygen and ignition sources and control measures
- Element 4: Fire protection in buildings
- Element 5: Safety of people in the event of a fire
- Element 6: Fire safety risk assessment

Unit FSC2 - Fire Safety Practical Application

How the course is assessed

Assessment is through an FSC1 open-book written exam and an FSC2 practical fire risk assessment carried out in a real or realistic workplace.

Unit FSC1 is a taught unit assessed by an Open Book Examination(OBE). External examiners appointed by NEBOSH marks candidate scripts.

Unit FSC2 is assessed by a Fire Risk Assessment carried out in the delegate's workplace.

The written practical has to be submitted to Southwest Health and Safety Training within 10 working days after the FSC1 exam.

Entry requirements

There are no formal academic entry requirements, but learners should have a good standard of written English and an interest in fire safety or health and safety management.

What you will get from the course

Delegates learn how to identify fire hazards, assess fire risks and put practical controls in place, so they can help prevent fires and protect people, property and business continuity.
