About this course

The IOSH Managing Safely course is a practical health and safety training course for managers and supervisors who need to manage risks in their teams. This IOSH Managing Safely training gives a clear, practical understanding of how to manage health and safety at work and what good day-to-day risk management looks like.

This IOSH health and safety course helps organisations to:

- Improve line management ownership of health and safety and reduce accidents and near misses
- Ensure managers understand how their decisions impact risk, safety culture and performance
- Strengthen compliance with health and safety legislation by clarifying individual responsibilities
- Embed a consistent, practical approach to risk assessment, incident investigation and performance monitoring

The IOSH Managing Safely course is structured into clear, practical modules and a final assessment, ending with a simple workplace risk assessment project to confirm you can apply what you've learned.

Studying by eLearning

- IOSH Managing Safely eLearning course delivered fully online so you can study anytime, anywhere at your own pace.
- Engaging, interactive modules with videos, quizzes and practical exercises focused on managing real workplace risks.
- Tutor and technical support throughout your IOSH Managing Safely eLearning journey.
- IOSH assessment and certificate included once you have completed the online course and end-of-course tests.

Who is the course for?

The IOSH Managing Safely course is designed for managers, supervisors, and staff who have responsibility for health and safety as part of their day-to-day role. It provides a solid foundation in health and safety management, making it ideal for those who want practical knowledge they can immediately apply in the workplace.

One of the key advantages of this course is its accessibility. No previous health and safety knowledge or experience is required to register. The tutor-led, jargon-free delivery ensures that learners from any industry background can engage with the content and build confidence in managing health and safety effectively.

This course is particularly suited to:

Managers and team leaders looking to improve their health and safety awareness.

Supervisors who need to better understand their responsibilities.

Staff with safety responsibilities who want a recognised qualification.

What you will learn

The IOSH Managing Safely course is structured around seven modules that provide a practical and comprehensive introduction to health and safety management. Each module is designed to give managers and supervisors the tools they need to manage risks effectively and promote a safer working environment.

IOSH Managing Safely Modules:

- Introducing Managing Safely - Why health and safety is essential for managers and how it impacts business performance.
- Assessing Risk - Understanding risk assessments and how to identify and prioritise workplace hazards.
- Controlling Risks - Practical methods for implementing risk controls and reducing potential harm.
- Understanding Responsibilities - Legal responsibilities for health and safety at work and the importance of accountability.
- Understanding Hazards - Common workplace hazards and how to control them effectively.
- Investigating Incidents - Learning from accidents and near misses to prevent recurrence.
- Measuring Performance - Monitoring and improving health and safety performance in the workplace.

How the course is assessed

The IOSH Managing Safely assessment is taken online, inside the learning portal, as soon as you complete the course. There is no need to travel to an exam centre or book a separate exam date.

- Work through the course modules online at your own pace
- Take the IOSH assessment online in the portal when you finish the course
- Receive your IOSH Managing Safely certificate when you pass

Entry requirements

One of the key benefits of the IOSH Managing Safely course is that it is open to everyone. There are no formal entry requirements, and no previous health and safety knowledge or experience is needed to register.

The course is designed to be practical, jargon-free, and accessible, making it suitable for:

Managers, supervisors, and team leaders who have responsibility for staff.

Employees with health and safety responsibilities in their daily roles.

Anyone looking to gain a recognised IOSH qualification to support their career development.

This means learners from any industry background can attend and benefit from the programme, regardless of their level of experience.

What you will get from the course

By completing the IOSH Managing Safely course, delegates will gain the knowledge, skills, and confidence to manage health and safety effectively within their teams. The course is designed to provide practical tools that can be applied immediately in the workplace.

Key Learning Outcomes:

A clear understanding of health and safety responsibilities for managers and supervisors.

Practical knowledge of how to identify, evaluate, and control workplace risks.

The ability to carry out and review risk assessments in line with IOSH standards.

An awareness of current UK health and safety legislation and how it affects day-to-day operations.

Improved decision-making when dealing with health and safety issues.

The confidence to promote a positive safety culture within their organisation.

On successful completion, delegates receive an IOSH Managing Safely certificate, a globally recognised qualification that demonstrates competence in managing workplace health and safety.
